

Excel Intelligence System

Overview

The Excel Intelligence System is designed to help professionals eliminate repetitive spreadsheet work by using AI as an intelligent Excel assistant.

Instead of searching forums or spending hours writing formulas, this system provides structured workflows that transform AI into a business productivity tool.

Workflow 1 — Formula Builder

Problem

Creating advanced Excel formulas is slow and frustrating.

Objective

Generate optimized formulas with explanations.

AI Prompt

You are a Microsoft Excel expert.

Help me create the best possible formula.

Context:

- Excel Version:
- Language:
- Dataset:
- Desired Result:

Requirements:

- Build the optimal formula.
- Explain every function used.
- Suggest a simpler alternative if available.
- Warn about common mistakes.
- Optimize for performance.

Expected Result

- Correct formula
- Formula explanation
- Alternative solution
- Performance recommendation

Workflow 2 — Data Cleaning

Problem

Business data is inconsistent.

Objective

Prepare datasets for reporting.

AI Prompt

You are a professional data quality analyst.

Help me clean the following Excel dataset.

Requirements:

- Detect duplicates.
- Detect formatting problems.
- Detect missing values.
- Detect inconsistent categories.
- Recommend cleaning strategy.
- Suggest Power Query when appropriate.

Workflow 3 — Dashboard Designer

Problem

Most dashboards contain too much information.

Objective

Create executive dashboards.

AI Prompt

You are an executive dashboard consultant.

Help me design an executive dashboard.

Audience:

Business Goal:

KPIs:

Current Data:

Requirements:

- Dashboard layout
- Best charts
- KPI hierarchy
- Executive recommendations
- Automation ideas

Workflow 4 — Executive Reports

Problem

Weekly reports consume too much time.

Objective

Generate executive summaries automatically.

AI Prompt

You are a senior business analyst.

Create an executive report using the following KPI information.

Requirements:

- Executive summary
- Key achievements
- Risks
- Opportunities
- Recommended actions

Workflow 5 — Business Insights

Problem

Data rarely explains what decisions should be made.

Objective

Transform raw information into decisions.

AI Prompt

You are a senior business consultant.

Analyze the following information.

Requirements:

- Identify trends.
- Detect anomalies.
- Explain business impact.
- Recommend actions.
- Prioritize recommendations.

Best Practices

Always provide:

- business context
- sample data
- expected outcome

- audience
- constraints

The better the context, the better the AI response.

Common Mistakes

■ Asking for "an Excel formula"

Instead ask:

"I need to calculate customer retention by month using Excel 365."

■ Asking:

"Analyze this."

Instead ask:

"Analyze this sales dataset to identify declining products and recommend actions."

Pro Tip

Treat AI as an Excel consultant—not as a search engine.

The quality of your instructions determines the quality of your results.

Excel Intelligence

Business Outcome

This Business System helps professionals reduce repetitive work while improving consistency, quality and decision-making.

Expected Business Impact

- Reduce repetitive work
- Increase productivity
- Improve deliverable quality
- Standardize business processes
- Accelerate decision making

Monthly Financial Closing System

Business Problem

Finance teams spend hours preparing monthly closing reports manually.

Business Objective

Produce accurate monthly financial closing reports using AI.

Target Audience

Finance Teams

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Monthly Financial Closing System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions

- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Executive KPI Reporting System

Business Problem

Executives wait too long for weekly KPI reports.

Business Objective

Generate executive KPI summaries with actionable insights.

Target Audience

Executives

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Executive KPI Reporting System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Sales Performance Analysis System

Business Problem

Sales reports identify numbers but not business opportunities.

Business Objective

Analyze sales performance and recommend actions.

Target Audience

Sales Managers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Sales Performance Analysis System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured

- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Budget Variance Analysis System

Business Problem

Budget deviations are difficult to understand quickly.

Business Objective

Explain budget variances and recommend corrective actions.

Target Audience

Finance Managers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Budget Variance Analysis System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language

- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives

- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Operational Dashboard Creation System

Business Problem

Operational dashboards often contain too much irrelevant information.

Business Objective

Design executive dashboards focused on decision making.

Target Audience

Operations Managers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Operational Dashboard Creation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap

7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Executive Productivity

Business Outcome

This Business System helps professionals reduce repetitive work while improving consistency, quality and decision-making.

Expected Business Impact

- Reduce repetitive work
- Increase productivity
- Improve deliverable quality
- Standardize business processes
- Accelerate decision making

Executive Decision Memo System

Business Problem

Executive decisions are poorly documented.

Business Objective

Produce concise executive decision memos.

Target Audience

Executives

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Executive Decision Memo System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Executive Presentation Builder System

Business Problem

Executive presentations require excessive preparation time.

Business Objective

Create presentation-ready business content.

Target Audience

Directors

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Executive Presentation Builder System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Weekly Leadership Summary System

Business Problem

Leadership updates are repetitive and inconsistent.

Business Objective

Produce weekly executive summaries.

Target Audience

Leadership

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Weekly Leadership Summary System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Executive Email Assistant System

Business Problem

Executive emails consume valuable time.

Business Objective

Draft executive-quality communications.

Target Audience

Executives

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Executive Email Assistant System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks

- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Strategic Meeting Preparation System

Business Problem

Strategic meetings begin without adequate preparation.

Business Objective

Prepare structured executive meeting briefs.

Target Audience

Senior Management

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Strategic Meeting Preparation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Project Delivery

Business Outcome

This Business System helps professionals reduce repetitive work while improving consistency, quality and decision-making.

Expected Business Impact

- Reduce repetitive work
- Increase productivity
- Improve deliverable quality
- Standardize business processes
- Accelerate decision making

Project Kickoff Planning System

Business Problem

Projects start without complete planning.

Business Objective

Produce structured kickoff documentation.

Target Audience

Project Managers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Project Kickoff Planning System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context

- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Weekly Project Status Reporting System

Business Problem

Weekly reporting consumes excessive project time.

Business Objective

Generate executive project reports automatically.

Target Audience

PMO

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Weekly Project Status Reporting System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge

- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Project Risk Assessment System

Business Problem

Project risks are identified too late.

Business Objective

Evaluate project risks proactively.

Target Audience

Project Leaders

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Project Risk Assessment System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Stakeholder Communication System

Business Problem

Stakeholder communication lacks consistency.

Business Objective

Produce professional stakeholder communications.

Target Audience

Project Managers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Stakeholder Communication System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Lessons Learned Documentation System

Business Problem

Valuable project experience is never documented.

Business Objective

Preserve organizational knowledge.

Target Audience

PMO

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Lessons Learned Documentation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Technical Documentation

Business Outcome

This Business System helps professionals reduce repetitive work while improving consistency, quality and decision-making.

Expected Business Impact

- Reduce repetitive work
- Increase productivity
- Improve deliverable quality
- Standardize business processes
- Accelerate decision making

OAuth Integration Documentation System

Business Problem

OAuth integrations are poorly documented.

Business Objective

Produce enterprise-grade OAuth documentation.

Target Audience

Integration Teams

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in OAuth Integration Documentation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts

- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

REST API Documentation System

Business Problem

API documentation is inconsistent across projects.

Business Objective

Standardize REST API documentation.

Target Audience

Developers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in REST API Documentation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices

6. Implementation Roadmap

7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Enterprise Procedure Documentation System

Business Problem

Operational procedures vary between authors.

Business Objective

Produce standardized enterprise procedures.

Target Audience

Operations Teams

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Enterprise Procedure Documentation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary

2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders

- constraints
- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Root Cause Analysis System

Business Problem

Incident reports rarely identify the true root cause.

Business Objective

Produce structured RCA documentation.

Target Audience

Support Teams

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Root Cause Analysis System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

Real Business Scenario

Example:

Company:

Medium-sized manufacturing company.

Situation:

Monthly operational reporting requires approximately 8 hours every week.

Objective:

Reduce reporting time by using AI while improving report quality.

Expected Result:

AI generates a structured report ready for executive review.

Implementation Notes

Always include:

- business context
- stakeholders
- constraints
- available information
- desired outcome

The more context provided, the better the results.

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Knowledge Transfer System

Business Problem

Critical knowledge is lost during project transitions.

Business Objective

Capture and transfer technical knowledge efficiently.

Target Audience

Technical Teams

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Knowledge Transfer System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry

- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable
- Structured
- Executive ready

Expected Output

The response must include:

- Executive Summary
- Business Analysis
- Recommended Actions
- Risks
- Opportunities
- Implementation Plan
- Final Recommendations

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

IT Troubleshooting

Business Outcome

This Business System helps professionals reduce repetitive work while improving consistency, quality and decision-making.

Expected Business Impact

- Reduce repetitive work
- Increase productivity
- Improve deliverable quality
- Standardize business processes
- Accelerate decision making

Production Incident Investigation System

Business Problem

Production incidents take too long to investigate.

Business Objective

Accelerate enterprise incident diagnosis.

Target Audience

Support Engineers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Production Incident Investigation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented
- Actionable

- available information
- desired outcome

The more context provided, the better the results.

Common Pitfalls

Avoid:

- Generic prompts
- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Enterprise Log Analysis System

Business Problem

Large log files are difficult to interpret.

Business Objective

Extract actionable information from enterprise logs.

Target Audience

Platform Engineers

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Enterprise Log Analysis System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices

- Missing business objectives
- Lack of context
- Undefined audience
- Ambiguous requests

Expert Recommendation

Treat AI as a Senior Enterprise Consultant.

Do not ask AI to "write something."

Instead, describe the business problem and the expected business outcome.

Performance Bottleneck Investigation System

Business Problem

Performance degradation is difficult to isolate.

Business Objective

Identify performance bottlenecks systematically.

Target Audience

Infrastructure Teams

Professional AI Workflow

You are a Senior Enterprise Consultant with extensive experience in Performance Bottleneck Investigation System.

Your objective is to help produce enterprise-grade deliverables.

Business Context

Describe:

- Organization
- Industry
- Business process
- Current challenge
- Expected outcome

Deliverables

Produce:

1. Executive Summary
2. Detailed Analysis
3. Recommended Actions
4. Risks
5. Best Practices
6. Implementation Roadmap
7. Executive Recommendations

Quality Requirements

- Professional language
- Business oriented

- Actionable
- Structured
- Executive ready

Expected Output

The response must include:
